Dear ICE/Domestic Policy Counsel/Office of the President:

As Director of the University of Houston Immigration Clinic and clinical associate professor, as well as a practicing attorney, I respectfully write to urge a change in policy regarding the repatriation of Haitian nationals during this time of need and desperation. I am a supporter of the President's and have been for a long time. I recognize his efforts thus far to make changes in the immigration detention system and administration of immigration benefits. I appreciate the changes which have been implemented in the time since his taking office and the changes I've personally witnessed as a practicing attorney. I appreciate the change in policy from the former administration which had imposed immediate detention for all Haitian asylum seekers without regard to history or background. Now, a renewed sensitivity is in order given the ravages wrought by natural disaster, disease, homelessness, and the daily atrocities facing Haitians in this time of need. I recognize the exigencies and political realities facing the administration and I also appreciate the fact that there needs to be enforcement to protect the public welfare from dangerous criminals. However, the current policy, as practitioners can attest, is being applied whole-cloth as a continuation of previous policies against Haitian nationals without making fine distinctions, such as for detainees with non-violent offenses, minor crimes and/or traffic offenses. The future will judge us by how we treat the most disadvantaged. The future will judge us not by our half-efforts but by our full commitments.

Respectfully,

Geoffrey A. Hoffman

Clinical Associate Professor
