Subject: Bayou Bridge Pipeline meeting last night

All,

I don't have the notes, yet, from the community meeting our team attended last night in St. James about the Bayou Bridge pipeline. But, in my initial conversation with staff who attended, it was positive.

- No negativity
- Nothing said in anger
- Little emotion from the community
- Just a respectful conversation about health concerns and how we might be able to address.
- We made no promises other than to respond back to what we heard.
- We also made it clear that this issue – concerns about something that is not yet in place - is somewhat new to use, and that we do not have any role in the permitting or regulatory process.
- No media attended

Bob
