

**Re: Bayou Bridge Pipeline, LLC ("BBP") v. 38 Acres, More or Less, in St. Martin Parish
Case No. 87011**

Landowners' Statement

December 2, 2018

Throughout this trial two things have remained constant: BBP sees the properties along its pathway through the Atchafalaya Basin (such as our property) as having little to no value. And BBP consistently confuses the notion of public good with the enrichment of their shareholders. We, the landowners fighting this case, do not make these mistakes. We pledge that any money damages potentially received from the court for being denied due process and trespassed upon will remain in Louisiana for the public good - to preserve the Atchafalaya Basin and to protect its people from predatory corporations. We are not in it for the money, BBP is.
