EXHIBIT 10
State of Louisiana Site Record Form

☐ Update

Site Name: Buena Vista Cemetery
State Site No.: 16SJ119
Other Site Designations: Buena Vista/Winchester/Minnie Plantation – Buena Vista Cemetery
Project/Field Site No.:

Parish: St. James
UTM Coordinates: Zone: 15
Easting: Northing: Datum: WGS 84

Site Condition (select all that apply)

Present Use: Other Conditions:
☒ Agricultural ☐ Pasture ☐ Inundated ☐ Shoreline Erosion
☐ Sylviclural ☐ Residential ☐ Heavy Erosion ☐ Clear-Cut
☐ Wooded ☐ Urban ☐ Light Erosion ☐ Modern Trash Dump
☐ Fallow ☐ Heavy Construction ☐ Roads or Trails ☐ Dredged
☐ Open Field ☐ Light Construction ☐ Transmission Lines ☐ Spoil Bank
☐ Yard/Lawn ☐ Industrial ☐ Submerged ☐ Other (please explain below)
☐ Paved ☒ Other (please explain below)

Surface Visibility: 41-60%

Site Condition and Setting Narrative: The primary location of the cemetery is just south of an east-northeast to west-southwest running field road and on both sides of another northeast-southwest trending field road. The property extends approximately 20 m west off of the second field road and extends off of FG property onto the adjacent landowner to the east. The UCAR pipeline runs through the axis of the cemetery, which has most likely caused disturbance.

Site Investigation (select all that apply)

Nature of Investigation: Other (please explain below)
Fully Delineated? No
Artifacts Collected? Yes

Investigation Surface Collection: ☐ Controlled ☐ Uncontrolled ☐ Test Units ☒ Trenches
Method(s): Shovel Testing: ☐ Systematic ☐ Judgmental ☐ Excavation Units ☐ Auguring
☐ Excavation Units ☐ Remote Sensing ☐ Coring

Site Dimensions: 84.30-x-81.89 m

Site Investigation Narrative: Based on the mechanical stripping and excavation, the site measures approximately 276.57-x-268.67 ft. (84.30-x-81.89 m) and is situated to the south-southwest of an access road and fence as well as to the east of a field road. A total of eight trenches were dug by a backhoe to define the cemetery boundaries (82.65-x-69.95 m) ranging from 60-100 cm in depth.

**Description of Material (collected and observed):**

| ☐ Pottery (American Indian) | ☒ Human Bone/Teeth | ☒ Construction Mat’l (brick, mortar, cement, wattle/daub) |
| ☐ Chipped Stone | ☐ Unmodified Bone (faunal) | ☐ Personal Items (jewelry, clothing, personal care) |
| ☐ Ground Stone | ☐ Floral Remains | ☐ Toys (dolls, marbles, tea sets) |
| ☐ Projectile Points | ☐ Wood | ☐ Recreation Items (dice, musical instruments, dominoes, smoking) |
| ☐ Fire Cracked Rock | ☒ Charcoal | ☐ Pottery (Non-American Indian) |
| ☐ Shell | ☐ Rubber/Plastic | |
| ☐ Poverty Point Object (s) | ☐ Farm Equipment | |
| ☐ Baked Clay/Earth Items | ☒ Glass | |
| ☐ Worked Bone/shell | ☒ Metal | |

**Artifact Description Narrative:** Artifacts recovered from the site included ferrous metal items (e.g. fragments, nails, barbed wire), faunal remains (e.g. unidentified large mammal epiphysis, large mammal tooth, horse proximal phalanx), charcoal, and glass as well as material associated with human burials such as human teeth and skull fragments *(left in situ)* and coffin materials (e.g. wood fragments and hardware).

Report Title: Archaeological Monitoring and Mechanical Stripping of the Acadia and Buena Vista Cemeteries, St. James, Louisiana Paul D. Jackson, Abigail Peeples, & Kay McKenna, 2019

Report Number:

Additional References:

Instructions for reaching Site: Starting from the Intersection of Highway 70 and Highway 18, drive 2.2 miles east along Highway 18, past the Mosaic plant. Turn right onto the third access road after passing the plant. Drive down the road for approximately .7 miles. The cemetery is located to the right of the access road directly south-southwest of the modern fence and field road that intersects the access road.

Site Name: Buena Vista Cemetery

Use this space to provide any important information that was not captured in the site form, including site, artifact, and feature interpretations. If this is an update, a brief summary of previous site interpretations should be provided. For larger sites, additional UTM coordinates for the site boundaries should be provided here. **If this investigation was a Phase II or III, the author should provide a more in-depth discussion regarding field methods, results, and interpretation than is expected from a survey.**

TerraXplorations (TerraX) was contracted by Providence Engineering and Environmental Group LLC to conduct archaeological and mechanical stripping of the Buena Vista Cemetery located on FG LA LLC property in St. James Parish, Louisiana in order to determine whether burials were present. Initial evidence of the cemetery appeared on the 1878 Mississippi River map of the area, and later historic aerials suggested the location remained for some time. However, since after 1961, the location appeared to have been covered by agricultural fields.

Excavations at the Buena Vista Cemetery included eight trenches running northeast-southwest. The trenches were placed just south-southwest of a fence bounding what was thought to be the original location of the cemetery. It was realized between the fence placement and this excavation, the topographic map used to locate the cemetery had an error placing the cemetery 300 ft. northeast of its actual proposed location. Trench length ranged from 15-102 m and were all the width of 1.2 m. In order to avoid the fence and field road running through the trench placement, the trenches were broken up into portions and labeled A-C, which can be viewed on the sketch map. Due to the high water table, water began to seep or spring up from the ground between 50-70 cm in every trench. Of the eight trenches excavated, three were positive for burials or potential grave shafts; Trenches 3, 5, and 9. Burials were mostly oriented east-west, however a few of the potential grave shafts appeared slightly askew. There appeared to be discernable spacing between the internments from the current excavated trenches, however, further excavation may reveal a tighter clustering of burials that cannot be perceived from the current work. Faunal remains were also located within these trenches that bounded out the cemetery, but none were associated with potential features and were generally located at shallower depths than the human remains.

During excavations, TerraX found four confirmed graves, many potential grave shafts, historic posts, and a large scatter of cultural material, all of which can be viewed on the sketch map. The boundaries of the site were determined by the outer locations of post holes and extended to the property boundary. The site was defined as being 84.30 m (276.57 ft.) in length and 81.89 m (268.67 ft.) in width. The boundaries of the cemetery were determined by the outer locations of the burials and potential grave shafts. Based on trenching, the cemetery was defined as being 82.65 m (271.16 ft.) in length and 69.95 m (229.49 ft.) in width. Based on the archival research and field excavations, the cemetery appears to be nineteenth to twentieth century. The absence of verifiable indications (headstones or through archival research) of who was buried in the cemetery leads us to believe it could have been a slave cemetery associated with the Buena Vista Plantation. Disturbances at this location are significant and include previous agriculture, field and canal construction, maintenance, and use, and pipeline construction (the UCAR pipeline runs directly through the long axis of the cemetery). Despite these impacts, numerous intact burials and grave shafts indicate much of the cemetery remains intact, particularly below 1.5 ft.
